

The Vision

By the grace of our Holy Mother more than 20 years ago Borotin International Sahaj Kindergarten started functioning. Our general vision that we would like to maintain what we achieved until now.

We function as a boarding kindergarten, in present we have 2 terms per year, each of them 3 months long. Our kindergarten is essentially a place where children socialise with other children in Sahaja Yoga and learn and meditate collectively, integrating Sahaj knowledge and culture. We live in a big Ashram, in Sahaj way with all dharmic value and experiencing the joy of our Spirit. Academically the education is based on Cambridge pre-school education with the method called Jolly Phonics. The children develop language and maths, spatial awareness, and motor skills through arts and craft activities and music and dance as well as exercise and play. They learn how to learn which prepares them for studying easily and quickly when they are older.

One of our long-term visions is to grow and make more space for our children. We would like to make sure that all children who are on our waiting list can attend in our kindergarten.

We are expanding our building with 4 classrooms connected with two bathrooms. Please enjoy a short video about it. For this work we always need the attention and help from our Sangha.

We also started a few years back the online Borotin so we are able to reach out kindergarten age children from all over the world at the same time. We would like to maintain and extend that initiative too.
